Web Developer

A result-oriented software engineering professional with more than one year of experience in web development and responsive web designing which includes more than one year of experience in Agile Process and tools. Good knowledge of agile methodology . Area of expertise include

• Angular	• Node.js
• React.js	• Responsive Web Design
• Javascript	• Agile Methodology
• Html	• CSS
• Mongodb	• Jira
• REST Api	• Micro services

Professional Summary

- o Web 2.0 technologies like HTML5 and CSS3,
- o Developing single page applications using Angular and React.js
- o Reporting and tracking the defects using bug tracking tool like jira.
- o Build reusable code and libraries for future use.
- o Contributed creative ideas and insights for improving usability of our application.

Technical Summary

Operating Systems: Windows, Linux & Mac

Web Technologies: HTML, CSS, Java Script, Bootstrap, JSON,

Frameworks: Angular, React.js

Bug Tracking Tools: Jira

Professional Experience

Archives, Jan 2018 – present

Front-end Developer

- Working Knowledge of front-end optimization and performance techniques.
- Makes design recommendations towards the development of new code or reuse of existing code.
- Taking an active role in structuring our single page applications to make them easy to maintain and to ensure they are highly modularized.
- Used Angular, React and bootstrap to create and modify styles for the project.

Projects (github)

Weight Calculator

- Worked with Methods and functions to complete the project.
- Used Bootstrap and Javascript to calculate and give weights in real time based on the inputs

Basic Calculator

- Used HTML and Javascript to create a simple and basic calculator.

Educational Experience

Centennial College – Toronto, ON. Apr 2016

 -Major: Mechanical Design   -Softwares : Mastercam , Autodesk Inventor

Anna University -Chennai, India. Apr 2013

 -Major: Mechanical Engineering   -Softwares: Ansys ,Solidworks ,AutoCAD
